August, 2022 - July, 2024

- Demonstrated the ability to handle multitasking to deliver a personable and streamlined experience for guests.
- Worked collaboratively with a team of servers, kitchen staff, and management to ensure smooth operation of the restaurant.

PROFILE

Mason Clark is an aspiring software engineer with a passion for coding and honing his skills as a developer. From a young age Mason has been enthralled with all things tech, primarily accredited to the long hours spent building websites and computers with his father and grandfather. Upon graduating high school, Mason pursued track & field at a University that did not offer a computer science degree, but he quickly realized his childhood passion for tech never went away. In 2022 Mason decided to transition into a career in tech by utilizing bootcamps, completing three bootcamps to date. To support himself during this time he began waiting tables in restaurants before breaking into the tech field in January of 2024. Mason is a talented young developer that is eager to continue leveraging his unique background to provide diverse perspectives to the projects he works on.
